# About Atom Security

-Established in 2001
-Based in the heart of Russian Science.
-The developed solution is perfectly suitable for enterprise-size organizations: 469 organizations with more than 100 employees use StaffCop
-International size: customers from 93 countries worldwide.

**Our vision**
We employ latest developments in the field of information security to provide business and governmental organizations with a tool able to improve their business efficiency and reduce risks associated with possible data breaches at accessible cost.

After implementation of Staffcop productivity increases by 38%

**4 Steps to Success**

1.Deploy the system
2.Implement the security policies
3.Define the risk group of users
4.Analyze activity and respond

**CEO – Dmitry Kandybovich**
*"To prevent data leakage, it's necessary to control corporate documents. Leakage can cause not only financial loss, but also law violations (for example, of processing personal data). These problems are solved by using special software solutions providing classifying corporate data and access to it, data encryption and tracking all the actions with data"*
